## EXPERIENCE

---

### Jimmy John's

January 2020 – Present

*Delivery Driver/In-shop*

- Working both as a delivery driver and an in-shop employee.
- Training to become assistant manager.

### Smooth Terminal

October 2018 – February 2019

*Content Marketing and Management*

- Performed marketing services for Smooth Terminal, an educational news site for programmers.
- Wrote content for the web, plus some traditional channels, with deep-rooted expertise in crafting the post for the platform.

### Optomi Professional Services

February 2018 – October 2018

*Technical Consultant / Full Stack Developer*

- Completed a 9-week bootcamp to gain proficiency in C#, .NET Core 2.1, ASP.NET MVC 5, Entity Framework Core, and SQL Server 2017.
- Mentored graduates of the bootcamp in HTML, CSS, JavaScript, jQuery, and source control.
- Developed applications for internal company use.

### Luckie & Company

October 2013 – April 2014

*Full Stack Developer*

- Maintained existing Ruby on Rails applications and added new functionality requested by clients.
- Developed Wordpress sites and plugins.
- Acted as a resource for junior developers looking to tackle problems using Ruby or PHP.

### Infomedia

June 2013 – October 2013

*Wordpress Developer*

- Used Wordpress to provide any kind of functionality requested by the clients, from the simplest content control to the most complicated e-commerce.
- Wrote ETL scripts to load data into Wordpress.
- Built a wide variety of Wordpress plugins from scratch.
- Partially implemented version control using Mercurial.

### Zeekee

October 2007 – June 2013

*Web Developer*

- Planned, developed, and maintained dozens of websites for well-known regional and national businesses.
- Built e-commerce, real estate, and social networking platforms for several clients using custom and third-party solutions.
- Wrote ETL scripts to load Real Estate data into a proprietary CMS. Specifically, I worked with RETS - a framework built to standardize the way clients interact with MLS systems.
- Worked extensively with both proprietary and third-party APIs and other technologies in various combinations to meet client demands.

- Acted as the liaison between clients and contractors when necessary.
- Interacted with clients through all parts of the development cycle, from planning to deployment.
- Trained junior developers to work with PHP, MySQL, JavaScript, HTML/CSS and our proprietary CMS.
- Significantly increased company profits by continually providing new capabilities for the salespeople to offer.
